

| Time(s) | Volume of Hydrogen Produced (ml) |
|---------|----------------------------------|
| 0       | 0.0                              |
| 10      | 16.0                             |
| 20      | 23.7                             |
| 30      | 29.7                             |
| 40      | 35.5                             |
| 50      | 40.8                             |
| 60      | 46.0                             |
| 70      | 49.8                             |
| 80      | 53.7                             |
| 90      | 57.3                             |
| 100     | 60.7                             |
